

Thank for your comments on \_\_\_\_\_. During the public comment period held between December 20, 2013 and March 20, 2014, NOAA and EPA did not propose a decision on the approvability of \_\_\_\_\_ and did not solicit comment on this issue during the public comment period. NOAA and EPA only are considering comments related to new development, OSDS, additional management measures for forestry and agriculture regarding CZARA at this time. The public will have an opportunity to comment on \_\_\_\_\_ at some point in the future before the agencies fully approve Oregon's coastal nonpoint program. If your comments are relevant when NOAA and EPA are requesting comment on that aspect of the program, then we encourage you to submit them at that time.
